Project Management 2.0

by - [Dave Garrett](#)

New technologies, concepts, and Web 2.0 tools are popping up everywhere. How can you use them to help your project team collaborate, communicate - or just give your project an extra boost? [\[Contact Dave\]](#)

courses are generally the most popular, the relevancy of the course based on the individual's experience and skill gap is the most important factor to consider when selecting an appropriate course or program. Many of our courses are offered in the public classroom, e-Training and instructor-led Virtual Classroom formats.

Q. How many more courses beyond the three would someone have to take to get an Associates or Masters through the program?

John: With just three courses total someone can earn an Associate's Certificate in Project Management from ESI and our academic partner The George Washington University. Since people can apply for and take up to three courses with SOS funds, they have the opportunity to quickly and inexpensively earn an impressive certificate which they can add to their resume. Students can earn a Professional Certificate in Business Analysis with a total of just five classes. Or a Master's Certificate in Project Management with a total of seven courses. Plus, GW will award advanced standing toward its Master of Science in Project Management to those who earn a GW/ESI project management Master's Certificate and meet other requirements. Our Course Counselors are available to help students determine the best courses to achieve their learning and career objectives.

I am not the boss of my house. I don't know how I lost it. I don't know when I lost it. I don't think I ever had it. But I've seen the boss's job and I don't want it.
